

Mediaflex-UMS leverages the power, speed and efficiency of StorNext via the StorNext API. Client-configurable commands include the ability to send requests to StorNext and receive back statuses and metadata. Mediaflex-UMS and StorNext work in partnership to managed the predefined storage tiers and Mediaflex-UMS manages the metadata pertaining to the assets, ensuring accurate information on the asset is always available. Other integrated features include media restoration and externalization of tapes.

#### MORE EFFICIENT CONTENT WORKFLOWS

The StorNext and Mediaflex-UMS solution delivers a highly efficient workflow that helps you manage the challenges of content proliferation. Key benefits include:

- **Improved collaboration:** Content creation doesn't happen in a vacuum. Whether your team has tens to hundreds of users in one location or is spread across the globe, the StorNext and Mediaflex-UMS solution enables high-speed file sharing, providing the access and performance required by busy post-production facilities.
- **Orchestrated workflows:** Automation at every level depends upon accurate metadata, collected and curated, to ensure the consistent application of workflows. In the software-defined Mediaflex-UMS environment, metadata is queried and updated automatically to orchestrate sophisticated workflows without operator intervention.
- **Powerful scalability:** As demand increases for more content at higher-quality resolutions, faster access to existing content, and the ability to accommodate a growing number of distribution formats, the need for more storage capacity also rises. StorNext powers your ability to grow as your needs change.
- **Operational agility:** Mediaflex-UMS workflows can be configured as a stand-alone point solution or as part of an enterprise-class management solution. Because the software is cloud native, it can be deployed on premise, in the cloud, or in a hybrid configuration, offering your business agility and flexibility.
- **Lower storage costs:** High-performance storage doesn't have to be expensive. A multi-tier StorNext solution automatically migrates your video content to the most cost-efficient tier of storage. Your organization can then affordably store data based on policies that you set.
- **Simplified archiving:** The demand for access to existing content for reuse and remonetization is growing. StorNext and Mediaflex-UMS work together to allow you to preserve and retain video content cost-effectively for the long term.

#### ABOUT QUANTUM STORNEXT

The Quantum StorNext platform powers modern high-performance workflows, enabling seamless, real-time collaboration and keeping content readily accessible for future use and remonetization. More than 100,000 customers worldwide trust Quantum to address their most-demanding content workflow needs, including top studios, major broadcasters, and cutting-edge content creators. With StorNext, customers have the end-to-end storage platform they need to manage assets from ingest through finishing and into delivery and long-term preservation.

#### ABOUT TMD MEDIAFLEX-UMS

TMD is a leading provider of software products focused on delivering media and content management solutions to the global media, broadcast, and archive sectors. Its Mediaflex-UMS platform is a cloud-native, service-oriented architecture for media-aware, software-defined workflows. TMD's flexible range of cost-effective applications for ingest, nonlinear delivery, post-production, digital asset management (DAM), media logistics, and archiving are available individually or integrated into the Mediaflex-UMS platform for complete and scalable end-to-end workflow solutions.

#### ABOUT QUANTUM

Quantum is a leading expert in scale-out tiered storage, archive and data protection. The company's StorNext® platform powers modern high-performance workflows, enabling seamless, real-time collaboration and keeping content readily accessible for future use and re-monetization. More than 100,000 customers have trusted Quantum to address their most demanding content workflow needs, including top studios, major broadcasters and cutting-edge content creators. With Quantum, customers have the end-to-end storage platform they need to manage assets from ingest through finishing and into delivery and long-term preservation.
